

Printing:

- We encourage all interested in printing with pushdot to contact us directly for more information about our pricing and materials. Each job is unique, and we want to give each project the individual attention it deserves. Feel free to call or drop by the studio anytime Monday-Friday, 8:30am-5pm.
- We use pigment-based inks, which combined with select papers, have archival longevity.
- Print sizes can be as large as 60" wide by the desired length.
- Additional prints from archived file at the same size or smaller are 25% off of the original price.
- Prints include up to 1" additional borders; Canvas Prints include up to 2" additional borders for stretching.
- Proof included with orders of 16"x20" and above.
- \$25 Minimum for Print Orders.**

Supplied Paper / Material:

- We encourage experimentation: our printers have unlimited potential, and we are constantly exploring new materials to expand creative horizons.
- If you have a material you want to try, give us a call or stop by to discuss.

Prepress Proofs:

- SWOP or GRACOL Certified color accurate proofs are available on 16" x 20" sheets for \$50 or half sheets for \$25.

Post Production / Prepress:

- Color correction; Prepress color work; Image restoration; Image composition.
- Hourly rate is \$100 - \$150 per hour, based on the complexity of project, billed in 1/4hour increments.

Scanning:

- Professional scans from negatives, transparencies, or prints.
- Virtual drum scanning ensures optimal scanning quality while leaving the original untouched.
- Scans can be done in the enhanced (16 bit) mode, which doubles the output file size.
- All Grayscale scans 16bit; Color default is 8 bit RGB Adobe 1998.
- All scanned images are cleaned for imperfections that are not on the original image.
- Scans are delivered on a CD as a TIFF file with an embedded profile.
- 25% Artist Discount on scanning

*Pricing is based on the number of MB (Megabytes) in the file generated by the scan.

Size of Image File	Cost
Up to 50 MB	\$25
Up to 100 MB	\$35
Over 100 MB	\$50

Examples of output file sizes at 300 dpi:

	8.5" x 11"	11" x 17"	16" x 24"	20" x 24"
Grayscale	8 MB	16 MB	33 MB	42 MB
RGB	24 MB	48 MB	100 MB	124 MB
CMYK	32 MB	64 MB	132 MB	165 MB

*Please call for a quote on quantity orders or special projects!

Studio Captures:

-In our photo studio, we can capture and create high resolution copy scans of virtually any size flat artwork. We offer years of professional experience in shooting and lighting artwork which when combined with our specialized software, result in delivering the ideal file for reproduction printing, web use, or documentation.

Size of Artwork	Cost
Up to 24"x36"	\$75
Over 24"x36"	\$100

*Additional charges may apply with pieces over 40", any special handling and/or lighting.

*Please call for a quote on quantity orders or special projects!

Portfolio Printing:

*Please contact us to discuss any questions, unique requests or potential discounts based on volume or special projects.

Paper

1. Printing can be single or double sided.
2. Paper is usually provided by the client. We can send a link to purchase the paper and have sent directly to us.
3. We have found that only a few papers excel in printing double sided along with exceptional image quality. We strongly recommend not printing on pre-drilled / scored paper to achieve the highest results and have the most flexibility in layout. Please contact us for more information about this.
4. Most double-sided paper is uncoated or matte finish. Single sided can be either coated or matte. Inks are archival.
5. A lacquer overspray is included for added protection/durability.

File Set-up

1. Images should be between 180- 360 dpi at final printing scale.
2. Images should be in RGB color space using Adobe 1998 on a calibrated monitor. Tiff files are the preferred format.
3. Ideally, the images should be placed into a file layout program such as InDesign to avoid additional file set-up costs. Working with a designer to help with this is recommended.
4. For full bleed printing, please include an additional 1/8" on each side. For spreads, the facing page needs to be offset 1.5" for gutter loss.
5. When setting up files or pages, be sure to include the gutter that generally will add 3/4" to the overall size. For example, if the visual opening of the portfolio is to be 11x14 inches, add 3/4" to the gutter side and center accordingly. For example, on an 11x14 inch landscape book, the page set-up size would be 11x14.75 inches, but the centering would still be based on the 11x14 visual opening.
6. Provide native file with all links and fonts. Include pdf for reference.

Costs and Process

1. One time set-up and loose color proofing per book: \$100. Includes "global" corrections based on first round proofing.
2. Printing per double sided page for most sizes on supplied paper: \$20 each /15% off additional book.
3. Printing per single sided page for most sizes on supplied paper: \$15 /15% off additional books.
4. Trimming, drilling and scoring: \$65 for up to 50 pages. \$35 for additional pages or books.
5. If we supply the paper: call for quote.
6. Additional color work or extra file prep: \$100/hr in ¼ hour increments.
7. Shipping and handling is additional.

Binding Products and Services Available

Timing (Call if needed quicker)

1. Set-up and proofing: 2-4 working days.
2. Printing: 4-6 working days.
