

**Printing:**

- We encourage all interested in printing with pushdot to contact us directly for more information about our pricing and materials. Each job is unique, and we want to give each project the individual attention it deserves. Feel free to call or drop by the studio anytime Monday-Friday, 8:30am-5pm.
- We use pigment-based inks, which combined with select papers have archival longevity. Giclée prints is one name for these.
- Normal turn around time is 2-3 business days for prints or proofing step.
- Additional prints from archived file at the same size or smaller are additional print price.
- Prints include up to 1" additional borders; Canvas Prints include up to 2" additional borders for stretching.
- Proof included with orders of 16"x20" and above

rev. 06.22

**Scanning:** Flatbed up to 12 x 17 and Film up to 4 x 5 inches

- Professional scans from negatives, transparencies, or prints.
- Virtual drum scanning ensures optimal scanning quality while leaving the original untouched.
- Scans can be done in the enhanced (16 bit) mode, which doubles the output file size.
- Grayscale default is Dot Gain 20% ; Color default is 8 bit RGB Adobe 1998.
- All scanned images are cleaned for imperfections that are not on the original image.
- Scans are delivered on a CD or as a download link in an email as a TIFF file with an embedded profile.

**-25% Artist Discount on Flatbed scanning**

- Normal turn around time is 2-3 working days.
- Pricing is based on the number of MB (Megabytes) in the file generated by the scan.

| Size of Image File              | Cost |
|---------------------------------|------|
| Web Use Resolution (up to 5 MB) | \$10 |
| Up to 100 MB                    | \$25 |
| Over 100 MB                     | \$35 |

Examples of output file sizes at 300 dpi:

|           | 8.5" x 11" | 11" x 17" | 16" x 24" | 20" x 24" |
|-----------|------------|-----------|-----------|-----------|
| Grayscale | 8 MB       | 16 MB     | 33 MB     | 42 MB     |
| RGB       | 24 MB      | 48 MB     | 100 MB    | 124 MB    |
| CMYK      | 32 MB      | 64 MB     | 132 MB    | 165 MB    |

- Please call for a quote on quantity orders or special projects!
- **\$25 Minimum on Web Use scan orders.**

**Studio Captures:** Flat 2-D Artwork up to 4 x 8 ft (call if larger)

-In our photo studio, we can capture and create high resolution copy scans of virtually any size flat artwork. We offer years of professional experience in shooting and lighting artwork which when combined with our specialized software, result in delivering the ideal file for reproduction printing, web use, or documentation.

| Size of Artwork | Cost  |
|-----------------|-------|
| Up to 24"x36"   | \$90  |
| Over 24"x36"    | \$125 |

- Additional captures in the same order that are approximately the same size and medium are discounted 25%.
- Normal turn around time is 3-5 working days.
- **Complimentary paper proofs are included.**
- Additional charges may apply with pieces over 40", any special handling and/or lighting.

## Portfolio Printing:

\*Please contact us to discuss any questions, unique requests or potential discounts based on volume or special projects.

## Paper

1. Printing can be single or double sided.
2. Paper is usually provided by the client. We can send a link to purchase the paper and have sent directly to us.
3. We have found that only a few papers excel in printing double sided along with exceptional image quality. We strongly recommend not printing on pre-drilled / scored paper to achieve the highest results and have the most flexibility in layout. Please contact us for more information about this.
4. Most double-sided paper is uncoated or matte finish. Single sided can be either coated or matte. Inks are archival.
5. A lacquer overspray is included for added protection/durability.

## File Set-up

1. Images should be between 180- 360 dpi at final printing scale.
2. Images should be in RGB color space using Adobe 1998 on a calibrated monitor. Tiff files are the preferred format.
3. Ideally, the images should be placed into a file layout program such as InDesign to avoid additional file set-up costs. Working with a designer to help with this is recommended.
4. For full bleed printing, please include an additional 1/8" on each side. For spreads, the facing page needs to be offset 1.5" for gutter loss.
5. When setting up files or pages, be sure to include the gutter that generally will add 3/4" to the overall size. For example, if the visual opening of the portfolio is to be 11x14 inches, add 3/4" to the gutter side and center accordingly. For example, on an 11x14 inch landscape book, the page set-up size would be 11x14.75 inches, but the centering would still be based on the 11x14 visual opening.
6. Provide native file with all links and fonts. Include pdf for reference.

## Costs and Process

1. One time set-up and loose color proofing per book: \$100. Includes "global" corrections based on first round proofing.
2. Printing per double sided page for most sizes on supplied paper: \$25 each /15% off additional book.
3. Printing per single sided page for most sizes on supplied paper: \$20 /15% off additional books.
4. Trimming, drilling and scoring: \$75 for up to 50 pages. \$45 for additional pages or books.
5. If we supply the paper: call for quote.
6. Additional color work or extra file prep: \$100/hr in ¼ hour increments.
7. Shipping and handling is additional.

## Binding Products and Services Available

### Timing (Call if needed quicker)

1. Set-up and proofing: 2-4 working days.
2. Printing: 4-6 working days.
